

the good design studio

the good design studio

Finnish American architect, Eero Saarinen, may be best known for his big, bold, bending forms — the Gateway Arch, the Dulles and TWA terminals. When built, these soaring spans of steel, glass and concrete seemingly disobeyed the law of gravity, and pushed the boundaries of convention and construction technology.

“The character or expression of any building can only be achieved if it is itself a total expression,” Saarinen said in 1957. “Like any work of art, it must be dominated by a strong, simple concept. All of its parts must be an active part of one dominant attitude.”

Fabulous or flawed, Saarinen’s designs were indisputably invigorated by his passion for harmonious detail. He believed that good design respects context — for example, a lever on a door, a door on a wall, a wall in a room, a room in a building, and so on.

We believe that, too. We’re The Good Design Studio — your partner in the epic pursuit of Good Design and the Total Aesthetic Opening; beautiful doors, frames and hardware from the ASSA ABLOY Group brands.

Of the People, By the People, For the Planet

Mason City, Iowa in January. The cold is indescribable. But it's home to the good folks at GRAHAM. Team MAIMAN hails from the birthplace of Route 66 — picturesque Springfield, Missouri. Both GRAHAM and MAIMAN make beautiful doors that contribute to the LEED rating of a building. FSC certified doors, rapidly renewable cores, and doors built with materials that contain no added urea formaldehyde are all part of the mix. And they're all made right here in America.

CECO and CURRIES, also ASSA ABLOY Group brands, make hollow metal frames with integrated weather stripping, thermally broken hollow metal frames, and hollow metal doors with insulated cores. Pair these doors and frames with PEMKO's gasketing, weather stripping and thresholds, and you've got one heck of an energy efficient door opening.

Will our energy efficient, "green" door openings save the planet? Maybe not. But come January, the folks in Mason City, Iowa will sure appreciate them.

Collection One

"Arbor-ecture" — what happens when wood meets metal.

Collection Four

Contemporary? Yes. Classic? Yes.
The pinstripes of architectural hardware.

Collection Five

Curves with attitude: *CURVE-I-TUDE*.

Collection Six

Sharp look, soft grip. Santoprene™

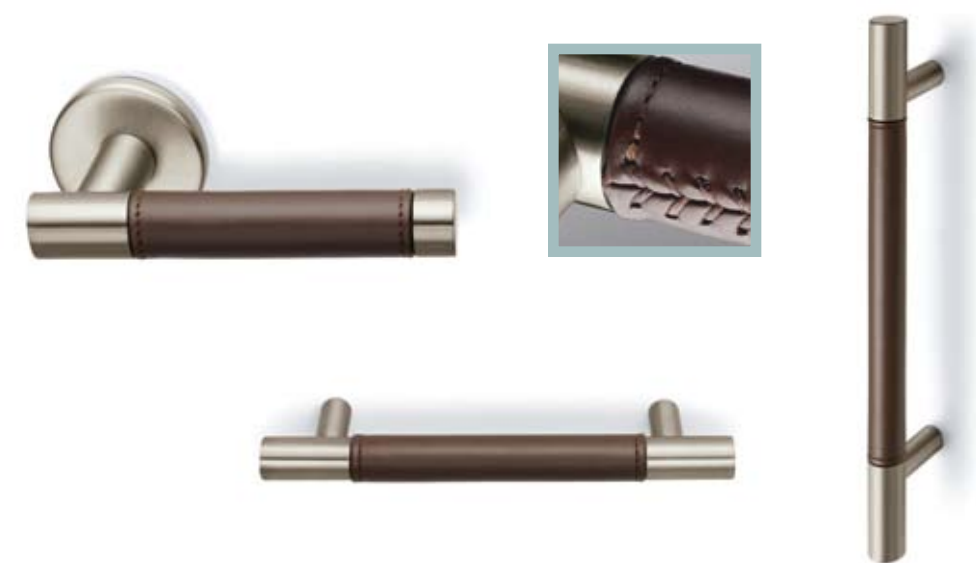

Collection Two

The dazzle is in the detail.

Collection Three

Leather grips like no other.
Hand stitched, flawlessly executed.

Collection Seven

Meticulous in every detail.

Door Stops & Hooks

Decorative Hardware Continuum

Minoru Yamasaki, architect for the twin towers of the World Trade Center, said that as a painter or a sculptor is consistent, "architecture must also be very consistent."

Consistency. We get that. In fact, the best thing about our decorative levers — other than the decorative part — is where you can put them. Access controlled and entry openings? Yes. Bathroom and closet doors? Absolutely. Stair tower and exit doors? Affirmative — we think they should look great, too!

Consistency. Definitely. Pick one of our great-looking levers, put it on every mortise and tubular lock, every access control and exit device ... every door in your building. You're smiling, right? We get that, too.

Decorative levers are sold on products offered by ADAMS RITE, CORBIN RUSSWIN, and SARGENT.

Most levers available in 13 finishes including brass, bronze, nickel, chrome, and stainless steel.
For a closer look, visit www.thegooddesignstudio.com

Roseless Trim

Mies van der Rohe said, "less is more," and he never even saw our Roseless Trim. It looks like a lever and a rose ... without the rose. We think Mies would approve.

Available with most decorative levers. Patent pending.

Doors may be the most intimate points of contact we have with a building. They should look great; swing or slide; defeat the heat; block the cold; be green; keep the peace; make us safe.

Tall order. But your local ASSA ABLOY Door Security Solutions team can help. They know doors, frames, locks, hinges, key systems, pivots, exit devices, closers, electromechanical, and electronic access control solutions. They'll even write your Door and Hardware specifications. Really. Call them. 877.217.0897.
