Checklist for Ordering 35

SteelComp unit featuring a Mundo steel door painted Paprika with Schlage Latitude lever and B60 deadbolt in Satin Nickel.

PANELLED STEEL

The nine lines in this design bring simple elegance to any architectural style of home. Partners with decorative or textured panelled sidelites.

Mundo

Height 6/8
Widths 2/10, 3/0
PREMMUN | STCMUN

Named for the popular New York neighbourhood, the Soho door takes a classic design and makes it modern. Choose glass sidelites to complement this stunning panelled door.

Soho

Height 6/8
Widths 2/8, 2/10, 3/0
PREMSOHO | STCSOHO

Simple embossing details provide a signature look for a timeless entry. The clean lines lend focus to the hardware selection and glass sidelites.

Vog

Height 6/8
Widths 2/10, 3/0
PREMVOG | STCVOG

Panelled doors do not accept glass though pair beautifully with direct glazed or panelled sidelites. Refer to page 25 for details. Painted doors are shown for marketing purposes only. Refer to page 33. Madero steel doors are available with wood or composite frame. Specify when ordering.

Chestnut stained Teak door with 36" MegaTek™ Offset Pull in aluminum door frame system by others.

WOODGRAIN FIBERGLASS

TEAK

Modern grooved teak woodgrain design is perfect for contemporary and retro style. Choose glass sidelites to complement this luxurious panelled door.

Grooved

Height 6/8
Widths 2/8, 2/10, 3/0
ENTG99

MAHOGANY

A one panel plank mahogany woodgrain door complements the sleek architectural styling of new home designs. Choose glass sidelites to complement this luxurious panelled door.

1 Panel Plank

Height 6/8
Width 3/0
ENRG12

Panelled doors do not accept glass though pair beautifully with direct glazed or panelled sidelites. Refer to page 25 for details. Woodgrain fiberglass doors are sold as natural tan door skin. We recommend paint or stain. Woodgrain fiberglass doors are supplied with matching grain composite frames.

Entrada Teak woodgrain door system shown in Coffee Bean stain with 14' Clear Low-E Sidelites and Transom and 16" Noirtek pull and Schlage L460P High Security Mortise lock.

Steelcomp Spotlight 3 Lite Square door system in custom paint with Cubed glass. Shown with MegaTek 36" Offset Pull and Schlage L460P High Security Mortise Lock.

STEEL & FIBERGLASS

SPOTLITE DESIGNS

Spotlites are the ideal choice for modern mid-century appeal, while complementing a variety of home designs. The clean smooth finish of a flush panel door partners well with Spotlite inserts. Six glass patterns available. Refer to pages 10-11 for glass options.

FRAME SPECIFICATIONS

Profile Insert

Steel & Fiberglass

The most widely used design for door glass frames has been a profiled screw-in glass insert. Usually the lowest cost option, these frames provide excellent insulation and require little or no maintenance. Profile frames do not require finishing but can be painted or stained to match your door colour. Choose from a traditional or contemporary profile (where available).

Flush Glazed

Fiberglass Only

Flush glazed fiberglass slabs provide sleek lines to give the perception of a more enhanced viewing area. The pre-pigmented smooth white or oak woodgrain slab is consistent from door edge to glass. The slab is manufactured as a one piece open and beaded mould with glass installed during the assembly process.

** Available in smooth white or woodgrain fiberglass only*

DECORATIVE GLASS OPTIONS

Your front entrance reflects your home's personality. From rich and classic styles to minimal organic patterns, our decorative door glass options bring distinctive beauty to your home.

Glass patterns shown are available in any door design that uses 1/2 Lite, 3/4 Lite or Full Lite glass. Panelled sidelites use matching glass, while a direct glazed sidelite will use Clear Low-E or Frosted glass.

Additional glass options at Madero.ca

TEXTURED GLASS OPTIONS

Striking a balance between privacy and security can be tricky. Our textured glass options bring an understated approach that creates a dynamic play of shadow and light while offering a filter to restrict visibility.

Glass patterns shown are available in any door design that uses 1/2 Lite, 3/4 Lite or Full Lite glass. Panelled sidelites use matching glass, while a direct glazed sidelite will use Clear Low-E or Frosted glass.

GLASS OPTIONS

CLEAR

Garden Patio Systems are available with clear Dual or Triple pane Clear Low-E glass inserts.

ENCLOSED MINI BLINDS LOW E

Enclosed mini blinds lower neatly within full privacy channels to eliminate light gaps.

GARDEN PATIO CONFIGURATION OPTIONS

Madero garden patio doors offer three select choices for your new construction or renovation project. Choose from single-hinged, double-hinged or garden venting door systems, offered in a variety of sizes, to fit your project. For full descriptions and options, visit www.madero.ca.W

Shown as LH Inswing

SINGLE HINGED

One Door Active | One Door Fixed

Ideal for accommodating multiple doors – creating a spectacular view

One door is fixed while the other opens as an active door. Fixed doors create the illusion of a full lite sidelite, allowing additional sunlight in to fill your room and provide a full view of the outdoors.

Shown as Outswing

DOUBLE HINGED

One Door Active | One Door Inactive

Full clearance double door system – provides the beauty of a garden patio door with full access to the outdoors

Complete with multipoint astragal, this product allows the inactive door to be securely locked and sealed or active as required. Active door must be double drilled.

Available as 6/8 Outswing only

GARDEN VENTING

One Door Active | One Door Venting

Designed to provide easy access to outdoor living spaces – as well as ventilation and natural light

These garden doors feature the active door as a typical swing door with optional sash lock. Specify single or double drilling. The venting door is complete with standard screen, roto hardware, and sash locks with tie bar.

STEEL DOORS

PREMIUM ^M High Definition Steel Slab Premium Wood Frame	STEELCOMP ^M High Definition Steel Slab Premium Smooth White Composite Frame
---	---

Durability

Door skins interlock with the stile, providing additional support to reduce delamination and stretching.

Strength and Security

Wood lock block provides strength and security while accommodating double bore lockset/deadbolt.

Energy Efficient

Filled with an insulating core of 100% CFC-free polyurethane foam, providing better energy ratings than a standard styrene core product.

‡ Polytex white paint is cool white while Madero's composite frames are warm white. To achieve a uniform appearance, painting will be required.

10 YEAR Limited Manufacturer's Warranty

Novatech's N600 series doors are prefinished with polytex white paint[‡] requiring no additional finishing to achieve a 10 year limited manufacturer's warranty. N600 doors include a 16" wood lock block for residential hardware.

FINISH WITH EASE

Steel doors are supplied with either primed or factory white polytex finish. Painting is required on primed doors.

Smooth white fiberglass doors are supplied in natural pre-pigmented warm white finish. Painting is not required, however the door will accept an array of paint colours to match your home.

Woodgrain fiberglass doors are supplied with factory almond colour, requiring paint or stain. Pre-finished stain options are available. Refer to page 33.

For dark coloured finishes, heat reflective paint is required to achieve a full warranty.

25 YEAR Limited Manufacturer's Warranty

FIBERGLASS DOORS

Madero's fiberglass door systems are specifically designed to withstand the harsh Canadian climate.

Durability

The fiberglass skins are resistant to dents, dings, splintering and corrosion. Composite stiles will not splinter like wood or delaminate like steel.

Exceptional Security

Our full length steel reinforced wood lock block offers exceptional security while allowing a range of hardware mounting options.

Energy Efficiency

Filled with an insulating core of 100% CFC-free polyurethane foam, providing an excellent R rating, while bonding the two door skins together.

Performance

Rigid structure prevents bowing and warping in extreme temperatures.

Waterproof

Crafted with HydroShield technology, the composite stiles and rails will never absorb water, eliminating rotting or swelling associated with wood.

PLUS ^M Smooth White Fiberglass Door Premium Wood Frame
FIBERCOMP ^M Smooth White Fiberglass Door Premium Smooth White Composite Frame
Entrada ^M Woodgrain Fiberglass Door Premium Woodgrain Composite Frame

* Painted or stained doors are shown for marketing purposes only.

COMPLETE FRAME SYSTEM

Madero exterior door systems are designed with high-quality components, ensuring every product incorporates a superior frame structure. All frame systems include premium extruded aluminum sill, hinges, weatherstripping and 2" 180 step brickmould (wood or composite) to complete the design.

5 YEAR
 Limited
 Manufacturer's
 Warranty on Frame
 Components

FRAME COMPONENTS

All of Madero's door frame systems are constructed with either wood or composite jamb and brickmould components. Available in 4-9/16", 6-9/16" or 8-9/16" jamb depths.

Composite

Woodgrain textured or pre-pigmented smooth white frame components are a blend of PVC and wood fiber composite substrate. Composite will not discolour, absorb moisture, splinter or rot. Smooth white composite does not require paint while woodgrain composite is supplied in its raw almond finish, requiring paint or stain to achieve a realistic, rich appearance.

Wood

Kiln dried, primed finger-joint pine—double primed for quality performance and ease of painting. Wood frame requires paint on all exposed surfaces within 45 days of purchase.

SnapLock Nailing Fin *(Composite only)*

Incorporating a hinge-style design, Madero's SnapLock nailing fin snaps into place for new home construction or can be scored and trimmed if not required.

WEATHER-TIGHT SOLUTION

Extended Reach Weatherstrip

Compression weatherstrip seals tight when the door is closed and expands when opened, providing a long-lasting weather tight solution.

Gaskets & Seal Pads

Gaskets and corner seal pads allow for uniform seal pressure, enhancing the weather barrier within the frame, and providing another level of protection from the elements.

Adjustable Strike

Adjustable strike plates provide a snug fit between the door and jamb, guaranteeing a secure connection with the latch and reducing rattling within the frame.

Sill & Bottom Sweep

Combination of sill and sweep provide a tight seal against moisture infiltration at the bottom of the door system.

ARCHITECTURAL DOOR PULLS

AVAILABLE FOR INSTALLATION ON FIBERGLASS DOORS. NOT COMPATIBLE FOR INSTALL ON STEEL DOORS.

The Rockwood Collection of architectural hardware is designed with strict attention to detail, from the selection of top-grade materials to application of the finest finishes. Madero stocks three families of Rockwood door pulls: SoftMet, NoirTek, and MegaTek. Choose from a 16", 36", or 60" stainless steel door pull, and then select your locking hardware. All door units with door pulls are constructed with two architectural grade roller latches.

For more options refer to www.madero.ca.

NOIRTEK™ COLLECTION

(STRAIGHT RM3910 / OFFSET RM3940)

NoirTek's durable black hard coat anodized grip complements many design schemes and is an appealing finish on its own.

- 16" CTC x 1-1/4" diameter straight or offset pull
- Black hard coat anodized grip, stainless steel mounts

Size: _____

MEGATEK™ COLLECTION

(OFFSET RM3311)

Ladder pulls are an artful and functional solution for a dramatic entrance design.

- 36" CTC or 60" CTC x 1-1/4" diameter offset pull
- Polished stainless steel

Sizes: _____

SOFTMET™ COLLECTION

(STRAIGHT RM2510 / OFFSET RM2540)

- Durable, weather-resistant black Santoprene™ grip—a high performance engineered thermoplastic elastomer
- 16" CTC x 1-1/4" diameter straight or offset pull or 36" CTC x 1-1/4" diameter offset pull
- Stainless steel ends and mounts

Sizes: _____

OFFSET VS. STRAIGHT

Offset vs. straight product styling is usually determined based on the aesthetics you are hoping to achieve, and the functionality required to ensure you have a product which meets your everyday needs.

Offset pulls are designed to incorporate a deadbolt along the length of the pull, allowing additional clearance when locking/unlocking the deadbolt, whereas a straight pull incorporates the deadbolt installation above the pull.

AVAILABILITY CHART

		16" Offset/ 16" Straight	36" Offset	60" Offset
1.	NoirTek	●	—	—
2.	MegaTek	—	●	●
3.	SoftMet	●	●	—

For more information on Madero's selection of Architectural Door Pulls, visit www.madero.ca

LOCKING HARDWARE OPTIONS

CYLINDRICAL DEADBOLT (B60)

- Cylindrical deadlock
- Anti-pick shield protects against hammer and crowbar attacks
- Fits into standard 2-1/8" hole
- Lifetime finish and mechanical guarantee
- Grade 1 - Highest Residential Security Rating
- Finishes: Matte Black, Satin Chrome

SCHLAGE

HIGH SECURITY MORTISE (L460P)

- High security mortise lock
- 3 year limited manufacturer's warranty
- Exceeds Grade 1 testing
- Minimalistic cylinder for architectural or European design
- Solid stainless and brass components
- The best in traditional keyed entry locks
- Finish: Satin Chrome

ALLEGION

ROLLER LATCH (RL30)

- Maximum projection of the roller is 3/8" allowing for variance in the door clearance
- Architectural grade
- Nylon roller standard mechanism
- Stainless steel construction
- Finishes: Stainless Steel, Oil Rubbed Bronze

IVES®

SENSE BLUETOOTH DEADBOLT (BE479 CAM / CEN)

- Keyless entry with access code - 30 code user capacity
- Easy to pair with your smartphone through Bluetooth Smart technology
- Battery-operated, no hardwiring required
- 3-year limited electronics warranty
- Grade 1 - Highest Residential Security Rating
- Finishes: Camelot in Satin Nickel, Century in Matte Black and Satin Nickel

Google Play

Note: Some regions may require a double latching system to meet local building codes. Contact your local building inspector for more information.

ARCHITECTURAL DOOR PULL VISUALIZER

DETERMINE YOUR DESIRED PRODUCT STYLE

Offset pulls are designed to incorporate a deadbolt along the length of the pull, whereas a straight pull incorporates the deadbolt installation above the pull.

Back-to-Back Mounting

Back-to-back mounting features two door pulls which are connected through the door, each pull opposite the other.

All Madero fiberglass slabs feature a full height lock block for lifelong performance.

Disclaimer: All measurements are calculated from the top left of door slab. Some regions may require specific drill locations for deadlock options. Contact your local building inspector for more information.

Soho steel doors feature shaker panelling. This double hinged door system features one active and one inactive door with multipoint astragal. Shown painted in Buttercup.

FINISHED TO SUIT YOUR STYLE

Madero has identified and selected some of the most popular paint and stain colours. Streamline the colour matching process for your project by selecting from Madero's popular colour choices.

Contact your supplier for more details.

FINISHED FRAME WIDTHS

Modern Door Series doors are available in 2/8, 2/10 and 3/0 widths—as noted in design specifications—with 2x4 (4 9/16"), 2x6 (6 9/16") or 2x8 (8 9/16") jamb construction, left hand or right hand application, and inswing or outswing. **Door dimensions are based on a 14" height rectangular transom and a sidelite.**

SINGLE DOOR (D) UNIT SIZING

Net Frame Width	
2/8	33 1/2"
2/10	35 1/2"
3/0	37 1/2"

SIDELITE-DOOR (SD) UNIT SIZING

Net Frame Door with 14" Sidelite	
2/8	48 7/8"
2/10	50 7/8"
3/0	52 7/8"

SIDELITE-DOOR-SIDELITE (SDS) UNIT SIZING

Net Frame Door with 2 - 14" Sidelites	
2/8	64"
2/10	66"
3/0	68"

FINISHED FRAME HEIGHTS (ALL SYSTEMS)

- 6/8 Inswing – Finished Frame Height: 82"
- 6/8 Outswing – Finished Frame Height: 81"
- 8/0 Inswing – Finished Frame Height: 98"
- 8/0 Outswing – Finished Frame Height: 97"

ROUGH OPENING MEASUREMENTS

To calculate rough opening, add 1" to width and add 1/2" to height of net frame.

ROUGH OPENING MEASUREMENTS TO INCLUDE TRANSOM

- For 14" transoms, add 15 3/4" to height of net frame.
- For decorative transoms, add 3/4" to width.

OSM BRICKMOULD

To calculate the outside measurement of the brickmould, add 2 1/2" to width and add 1 1/4" to height of net frame.

Inswing - Right Hand

Outswing - Right Hand
