LOW E Upgrade to Low-E Glass

Select storm doors can be upgraded to Low-E glass. Factory-coated Low-E glass minimizes the amount of UV rays that pass through to help reduce fading. Plus, Low-E delivers exceptional energy efficiency and can increase the insulating value of an entry by 24% compared to clear glass.

The Low-E Advantage

Helps keep rooms cooler in the summer by reflecting the sun's heat.

Helps keep rooms warmer in the winter by minimizing heat loss.

Look for this icon on models that offer Low-E glass options.

Platinum Collection Features

Platinum Security

Additional security with multi-point locking system. QuickFit™ handleset sold separately.

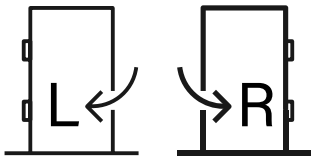

Platinum Hidden Closer

Hidden built-in closer with Click&Hold™ technology to hold the door open.

Platinum Triple Seal

Triple weatherstrip to help protect your home and entry door from harsh weather.

Platinum Pre-Hung Door

Pre-assembled for easy surface mount installation. Select L (left-hinge) or R (right-hinge) as viewed from outside.

The Fast Install

Pre-assembled for easy surface mount installation. Just place on the opening and secure with pre-attached screws.

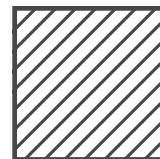

Lifetime Limited Warranty

Aluminum Frame

Constructed with heavy-duty, low-maintenance aluminum and surrounded by a dual or heavy-duty weatherstrip for exceptional weather resistance.

Composite Surface

Durable weatherstrip and high-performance composite surface over solid wood core deliver weather-resistant protection that lasts.

French Door Kit Available

French Door Conversion Kit

With Larson's French Door Conversion Kits, Larson storm doors are easily adapted for double-door entry applications. Each kit includes detailed installation instructions, all necessary hardware, astragal, and special drip cap. Dummy handle available on select models (sold separately).

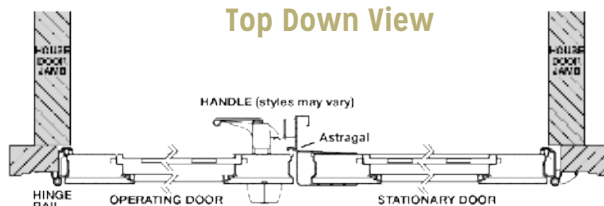

With a French Door installation, you will have one left-hinge door and one right-hinge door. The astragal included in your French Door Kit replaces the latch side mounting rail included with each door. The full width drip cap included in the French Door kit replaces the top drip caps included with the doors.

French Door Conversion Kit

Availability

Models: 298SS, 37050, 146, 360, 150, 830

Colours: White, Brown, Black (146, 150 only)

Width: 64", 68" (298SS, 146 white only), 72"

Height: 80"

Measuring Guide

1. Measure full width of opening from jamb exterior trim where storm doors will attach to the trim.
2. Measure full height of opening from head exterior trim to threshold where storm doors will attach.
3. Compare your dimensions with the standard French storm door opening size guide. If your opening does not match a standard, you need custom French doors.

Note: Continuous wood shims up to 1/4" thick can be installed behind both hinge mounting rails, allowing a given width of standard doors to fit an opening 1/2" wider. Extra long screws will be needed to secure.

Ordering French Door Units

Standard Sizes: Order two standard size doors and a standard size French door kit.

Custom Sizes: Measure the true opening size of the entry and order the doors as one custom French door configuration with that measurement in inches. (For example, 73" x 84") Use the same measurement to order a French door kit separately.

Typical Larson Storm Door French Door Installation

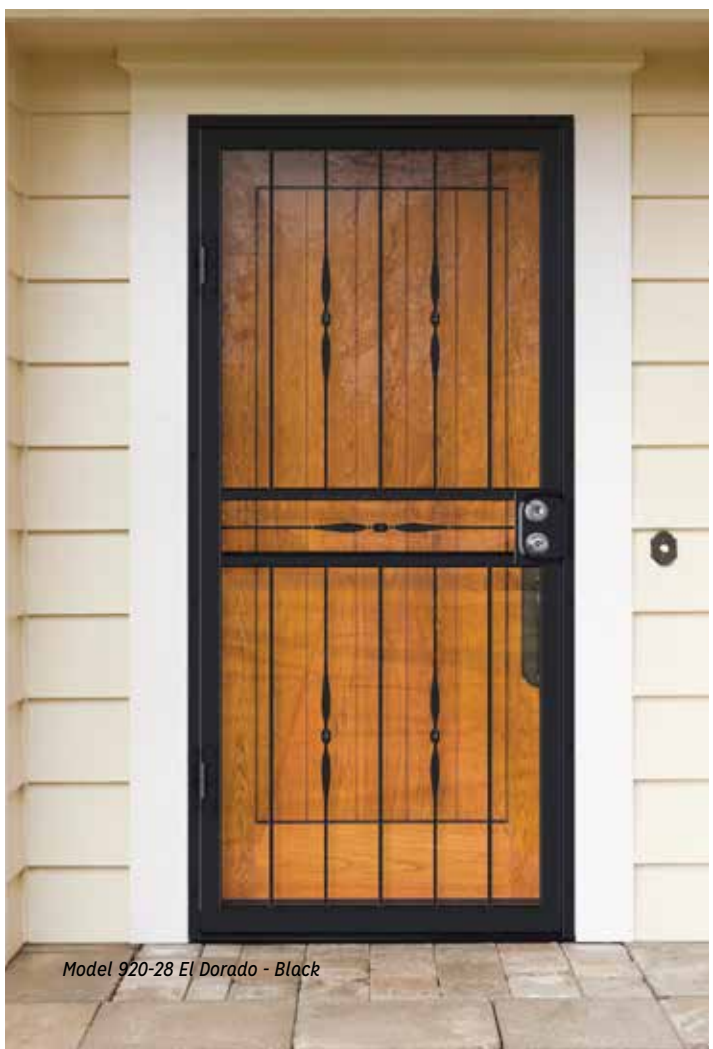

Kit parts, instructions and astragal vary by model.

Guardsman Security Storm Doors

The Guardsman Collection offers a complete line of steel security doors engineered to protect what matters most without sacrificing style and ease of use.

The welded tubular steel frame and three-piece tempered safety glass system provide superior strength, and the anti-removal vault pin and heavy-duty hinges add reinforced protection. Interchangeable insect screens are sold separately for seasonal venting.

Heavy-duty 7" hinges for a secure mount.

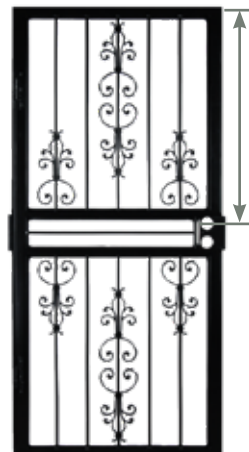

Too Many Keys?

Provide your own hardware so you can open your entry and security doors with the same key.

Select standard entry door hardware with a 2-3/8" backset and 2-1/8" hole diameter.

Lock Box Location

Standard

Hardware location for Guardsman doors are figured from the top of the opening down to the center of the lever/knob which is mounted in the top hole of the lock box. Based on a standard 81" door, this measurement is 38".

Custom:

When ordering, indicated the distance from the top of the door opening to the center of the lock box. Allowable location is center of the door based on the centered ordered opening height + or - 12".

Example: Opening Height: 83"

Center of Door: 41-1/2"

Maximum Height: 53-1/2" (41-1/2" + 12" = 53-1/2")

Minimum Height: 53-1/2" (41-1/2" - 12" = 29-1/2")

Brisa 7721 Single Door

Measuring Guide

Applies to inside mount applications.

1. Begin by deciding where best to position the screen. The opening must be plumb, level and square, and the bottom guide of the retractable screen must rest on a flat, level and solid surface. Make any needed adjustments to the opening (or plan and allow for shimming) before measuring for the screen.
2. Determine the net screen opening dimension (width x height) as measured from the outermost edges of where the retractable screen will rest. Screens are then made to fit these dimensions. Manufacturing tolerances are plus or minus 1/16".

We recommend that with inside the frame installations (options A or B) that you deduct an additional 1/16" from the width and height dimensions that you submit in order to assure that the screen is not too tight in the opening during installation. If you plan on using shims or threshold transitions, be sure to also deduct appropriately for these.
