Restroom accessory selector guide.

## Building types defined.

### Standard use buildings.

Representing the majority of small to mid-size properties, Standard Use Buildings are usually located on suburban sites and outside the central business district. Two-three story low-rise office buildings are the most common examples of this category, however suburban elementary, middle and high-schools, colleges, retail strip malls, satellite healthcare, manufacturing plants and modest hospitality facilities may be included.

Restroom usage ranges between light and moderate and some degree of use and abuse can be experienced calling for more durable, vandal-resistant accessories.

Budget sensitivity is almost always a consideration. In light of these factors, Bobrick's complete line of ClassicSeries® recessed and surface-mounted accessories is always recommended for both the lavatory area and for toilet partition accessories as well.

### Prestige buildings.

Corporate headquarters, central business district class A office buildings, major universities, medical centers, upscale hospitality (hotels, resorts, restaurants, country clubs), and civic center icons (performing arts centers, main branch libraries, museums) are represented in this category. Here, the emphasis is on high design and contemporary styling.

Restroom usage ranges between light and moderate with insignificant use and abuse factors experienced such as graffiti and vandalism.

Bobrick's curvilinear ConturaSeries® of lavatory area and toilet partition accessories are the most popular models for prestige buildings. Another appropriate selection is Bobrick's recessed TrimLineSeries™ featuring Bauhaus flush panels for an ultra-contemporary minimalistic design theme.

### Heavy traffic buildings.

Sports stadiums and arenas, transportation facilities (airports, train and bus stations), concert venues, outdoor recreation centers, major shopping malls, fast food operations, movie theaters, urban K-12 schools and government buildings are examples.

Heavy use and abuse of the restrooms due to major traffic flows can be a daily occurrence, therefore extra-durable, vandal-resistant accessories are advised. Products such as TowelMate® Dispenser Accessories and SureFlo® Soap Dispensers improve cost-in-use performance. Additionally, cleanability and graffiti removal are required. One other factor to keep in mind is large capacities for soap, towel and toilet tissue dispensing to minimize labor.

Bobrick's ClassicSeries is once again recommended, with the emphasis on recessed mounting to minimize vulnerable accessory elements that project into the restroom space.

**DESIGN**

Three #4 satin finish stainless steel series integrate with restroom accessories and fixtures, and interior styling concepts.

**FREEDOM**

Purchase consumables on the open market at opportunity pricing versus long-term proprietary contract procurement.

**ECONOMICAL**

Universal soap and paper towels result in cost-in-use savings compared to proprietary consumables at locked in prices.

**SUSTAINABLE**

Crafted of 50%-70% recycled stainless steel; universal soap reduces post-consumer waste by 57% versus cartridges.

**COMPLIANT**

Operable parts and controls comply with ADA guidelines for five pounds of force and no tight twisting or grasping.
